User Login

- **Actor**: User (Employee, Admin)
- **Description**: The user enters their email and password to log into the platform.
- **Precondition**: The user must have a registered account.
- **Postcondition**: The user is authenticated and redirected to their dashboard.
- **Primary Flow**:
    1. The user navigates to the login screen.
    2. The user enters their email and password.
    3. The system verifies the credentials.
    4. The system grants access to the user's dashboard.
- **Alternate Flow**:
    1. If credentials are invalid, the system shows an error message.

Client Assignment

- **Actor**: Admin
- **Description**: An admin assigns a user to a client to allow collaboration.
- **Precondition**: The client profile exists.
- **Postcondition**: The user is successfully associated with the client.
- **Primary Flow**:
    1. The admin selects a client profile.
    2. The admin adds the user's email to the list of assigned collaborators.
    3. The system updates the database to include the user under the client.

Add Task for a Client

- **Actor**: User
- **Description**: The user adds a task for a specific client.
- **Precondition**: The user is assigned to the client.
- **Postcondition**: The task is saved to the client's tasks list.
- **Primary Flow**:
    1. The user navigates to the "Tasks" channel for the client.
    2. The user fills in the task description and recurrence value.
    3. The user submits the task.
    4. The system saves the task and displays it in the task list.
- **Alternate Flow**:
    1. If required fields are missing, the system prompts the user to complete them.
